

## ECOLOGIC

Since its foundation in 1985, Reviglass has taken its responsibility towards the eco system and environment very seriously. We continue to strive towards improving our technology and preserving the environment .

### 100% RECYCLED GLASS

The glass mosaic produced by Reviglass is made from 100% first grade recycled glass.

### 0 EMISSIONS

The use of electrical kilns and no burning of fossil fuels ensures zero emissions to the atmosphere.

### ENERGY SAVING

The use of recycled glass allows a reduction of up to 60% in the consumption of energy during the production process. This amount is considerably lower when comparing it with other similar flooring materials.

### ECO-FRIENDLY PACKAGING

The packaging used by Reviglass is 100% recycled.

### ECOLOGIC BACKING SYSTEM

The revolutionary "Polyurethane cord" backing system is a totally innocuous material.
